THE SPACE CENTER AND THE VAN ALLEN FOUNDATION OF THE UNIVERSITY OF MONTPELLIER

The Space Center of the University of Montpellier (CSUM) is the French leader in university nanosatellites.

Its **technical team** is made up of around twenty people. It **designs and develops nanosatellites** from the mission phase to launch and flight operation.

It hosts and supervises **French and international students from bachelor's to doctorate level** as part of projects or internships.

Thanks to funding from the Van Allen Foundation, the CSUM hosts talents from universities and engineering schools. It allows the industrial and academic world to collaborate in order to provide hands-on training in space engineering, to innovate and promote the transfer of technologies and knowledge.

NANOSATELLITES

Nanosatellites make it possible, **at low cost, to carry out technological demonstrations in flight and to carry out innovative missions.**

With an initial format of **a cube of 10cm sides, called a unit or 1U, these can be added, and thus form 3U, 6U, 12U, or even 24U nanosatellites.**

The nanosatellite design technologies belong to the University of Montpellier and are 100% French.

BECOME A FRIEND OF THE VAN ALLEN FOUNDATION

- Help **fund student internships** in space-related professions from Bac+2 to Bac+8 of higher education,
- Support **the employability of our young people,**
- Help **fund CSUM's nanosatellite projects.**

WHAT ARE THE ADVANTAGES OF BECOMING A FRIEND ?

- Invitation to the live broadcast of the **launches of our upcoming satellites** at the Montpellier University Space Center,
- **Invitation to conferences** organized by the Van Allen Foundation,
- Presentation of the "Friend of the Van Allen Foundation" **certificate,**
- **Your logo on our website and on our sponsors' wall** located in the entrance hall of the Space Center at the University of Montpellier.
